Subject: FINAL SUBMISSION - TALL OIL AND RELATED SUBSTANCES - PINE CHEMICALS
ASSOCIATION - CONSORTIUM REGISTRATION NO.

Attached is the Final Submission for Tall Oil and Related Substances including the robust summaries of all data.

Based on discussion with Richard Hefter, it is our understanding that this document will be posted on the HPV website identified as a "Final Submission" and not as a revised test plan. For consistency, we would also like to suggest that the Robust Summaries that are a part of the attached Final Submission (which are slightly revised) be substituted for those now on the website and be labeled accordingly, e.g. "Final Robust Summaries".

We also have a related request pertaining to this particular final submission. In October 2003, PCA sent to EPA a document Entitled "Final Data Summary for Tall Oil and Related Substances" (#201-14783) which is presently posted on the HPV website as a "Revised Test Plan". We are requesting that the posted version be removed from the website since the attached Final Submission for Tall Oil and Related Substances supercedes it as it contains a new section addressing category validation.

With the posting of the attached new document under the heading of Final Submission, the Pine Chemicals Association believes that this brings to a conclusion our commitment to the HPV Challenge Program for these eight substances.
